

# S1000D<sup>v2.0</sup> authorPro™

## Feature Enhancements

AuthorPro v2 is the latest release of Inmedius' robust S1000D authoring solution, and incorporates added functionality and enhancements requested by our valued clients. This document highlights and briefly describes the most significant changes and updates included in the August 2006 AuthorPro release.

### Enhanced S1000Dmanager™ Connectivity and Interactivity Check-in Check-Out Feature

Further integration improves ease of use with user access to the Manager Inbox, allowing Check-in and Check-out directly from AuthorPro.

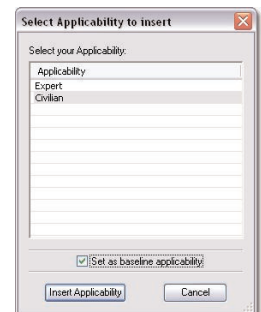

### Improved Integration with S1000Dtransition™ Baseline Applicability Feature

Ability for authors to assign a baseline applicability processing instruction used in Transition as part of the Effectivity workflow process, supporting the publishing of specific product configurations. The baseline sets an overriding default, core or primary configuration applicability for individual Data Modules (DM). This new feature allows core configurations to be published without all the different variant configurations, expanding publishing capabilities.

### Other New Features, Enhancements

- Inclusion of ASD 1000D Specification 2.2.1 schema patch in the standard 2.2 applications
- Support for Arbortex™ Epic™ v5.2
- Replacement License System includes new license installer and an upgrade key system
- Transition Integration
  - » Chapterizations Tools ease the process of configuring Publication Modules (PM)
  - » New formatting options for printing
- New Option to include Inwork markings in margin of page
- New Preference options
  - » Capability to default the Random List Type
  - » Ability to load Alias files for use with Issue 2.0 and above, allowing the user to rename attributes to be more descriptive or user friendly
- File format changed from GIF to TIFF for the default custom logo in the page header
- Ability to display currently active project definitions
- Revised Toolbar, enhancing navigation
- General Improvements in response to customer requests and issues to improve the operation, ease of use, performance and integration of AuthorPro with the S1000D Publishing Suite and other software tools
