

S1000D authorPro™ v3.0

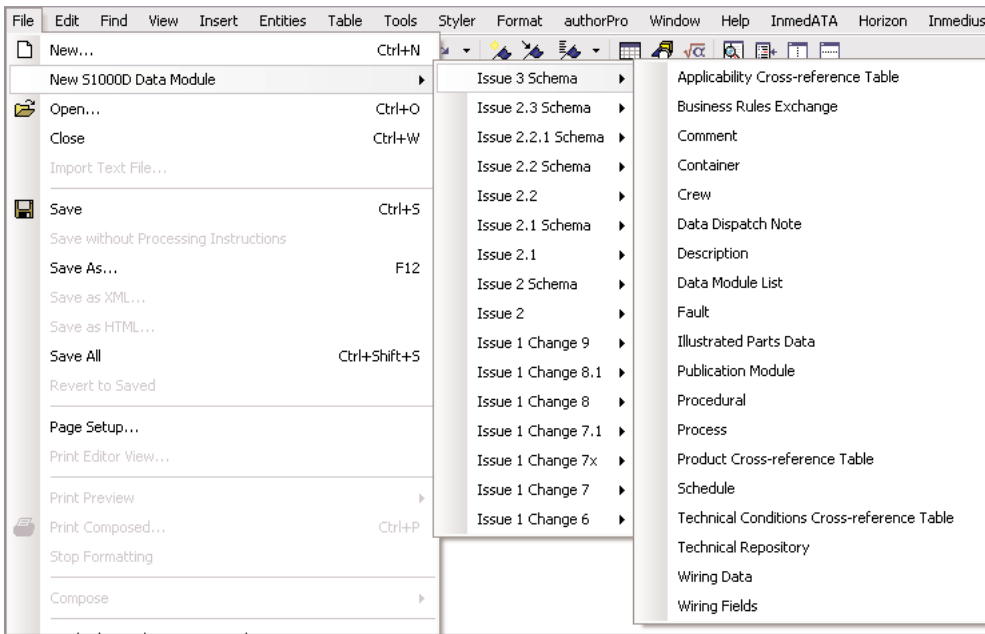

Feature Enhancements

Delivers Specification Schema Support, Seamless Integration

S1000DauthorPro provides complete support for ASD S1000D™ Issue 2.3 and 3.0 schemas, and has been updated concurrently with **Inmedius S1000Dmanager™** for seamless compatibility. Manager v3.0 is the next evolution in S1000D management, with the document type functionality of a Content Management System (CMS). The robust, yet easy to use **Inmedius S1000D Publishing Suite™** modules work together, integrating authoring through publishing.

Also included in the AuthorPro v3.0 release are features and enhancements requested by our valued clients. This document highlights, illustrates and briefly describes those additions.

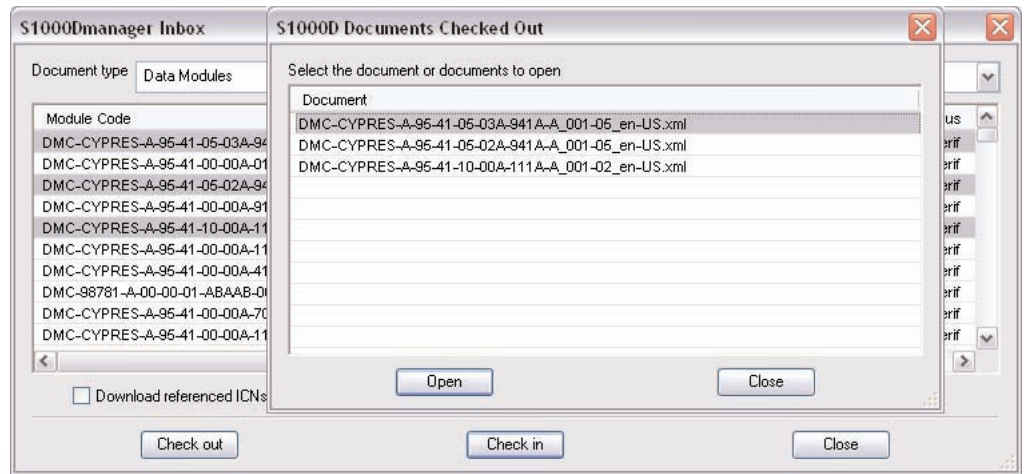

S1000D Issue 3.0 Schemas Support

Ability to create and edit S1000D Issue 3.0 schemas.

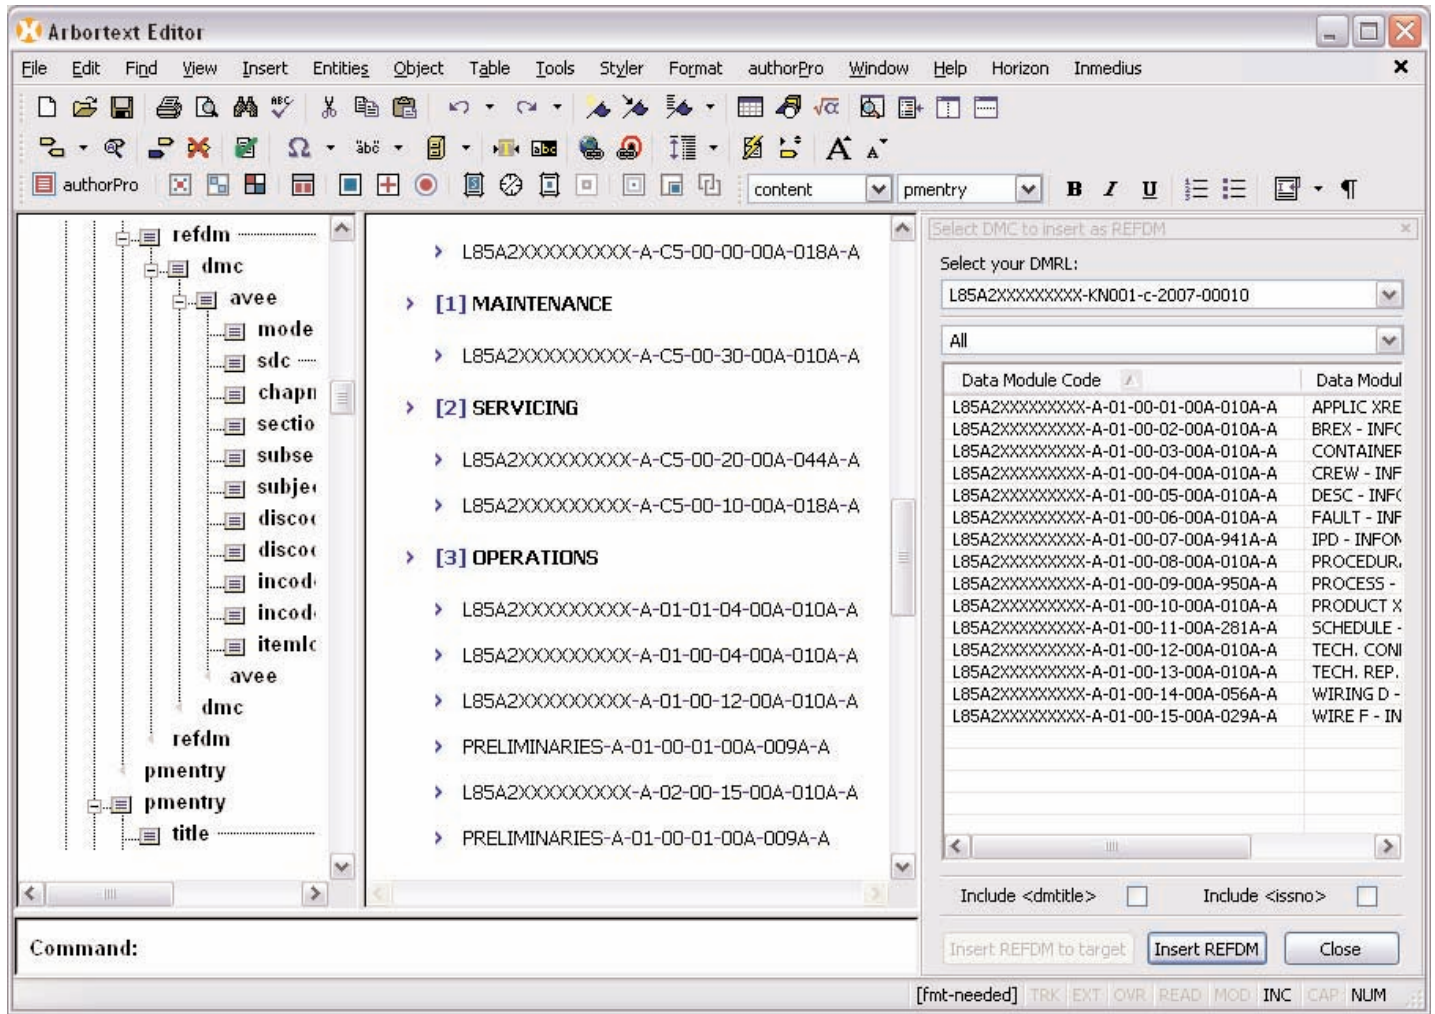

User Inbox Check Out Options Added

Users may now Check Out multiple files from the Inbox in a single action. Publication Modules (PM) and Data Module Requirements Lists (DMRL) are also available for Check Out.

Expanded Filtering, Support for Reference Data Module (REFDM)

Ability to filter the REFDM choices by a specific Standard Numbering System (SNS), along with extended support for REFDM within PMs was added.

New SGML Document Type Definition (DTD) Variants

Supports the German (DASA) 1.7x DTDs.

Citrix® Support

AuthorPro V3.0 allows multiple user access in a Citrix application delivery structure environment. User configuration information (Check Outs, Preferences, and Project Configuration) is included in the User Profile. The configuration password is encrypted within the local user settings file for added security.

Other Enhancements

- Automatic DTD validation before Check In.
- Formatting and configuration support for specialized inline elements Quantity and Verbatim.
- Option to clear Check Out/working folder of unlocked documents.
- Text substitution preferences for disabling/enabling automatic substitution of special characters.
- Drill page continuation headers in print formatting.
- Hotspot validation option in batch mode.
