

S1000D manager™ v3.2

S1000D authorPro™ v3.2

Feature Enhancements

Delivers Basic Specification Issue 4.0 Schema Support, Seamless Integration

The latest releases of both Inmedius **S1000Dmanager™** and **S1000DauthorPro™** provide initial support for the ASD S1000D™ Issue 4.0 schemas, and have been updated concurrently for seamless compatibility. Manager and AuthorPro are two of seven modules in the **Inmedius S1000D Publishing Suite™**, supporting the entire S1000D™ documentation lifecycle. The robust, yet easy to use software modules work together, integrating authoring through publishing.

The tags have been completely revised in Issue 4.0 of the Specification, requiring significant updating to editing and management systems. The inherent architectural design of the S1000D Publishing Suite provides the flexibility necessary to quickly and easily adapt to the Specification's requirements. Inmedius is the first software developer to implement support for Issue 4.0, and will continue to move forward aggressively in extending the number of document types and level of system support to address additional, more complex 4.0 capabilities.

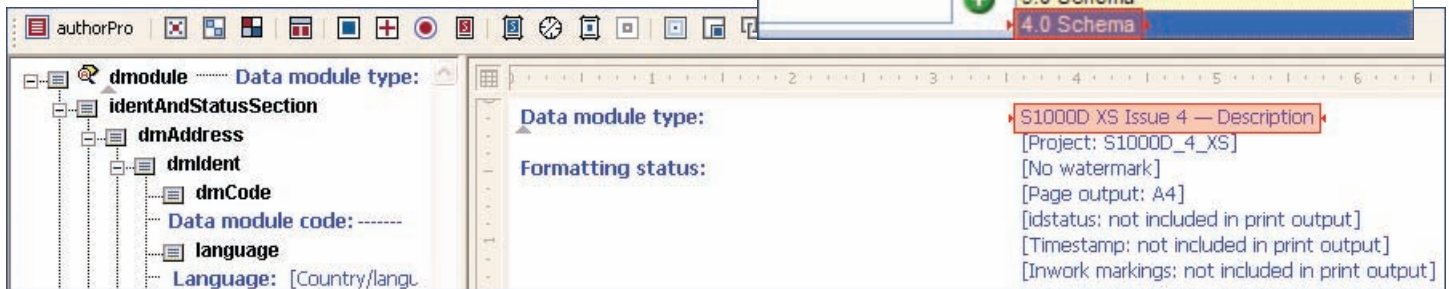

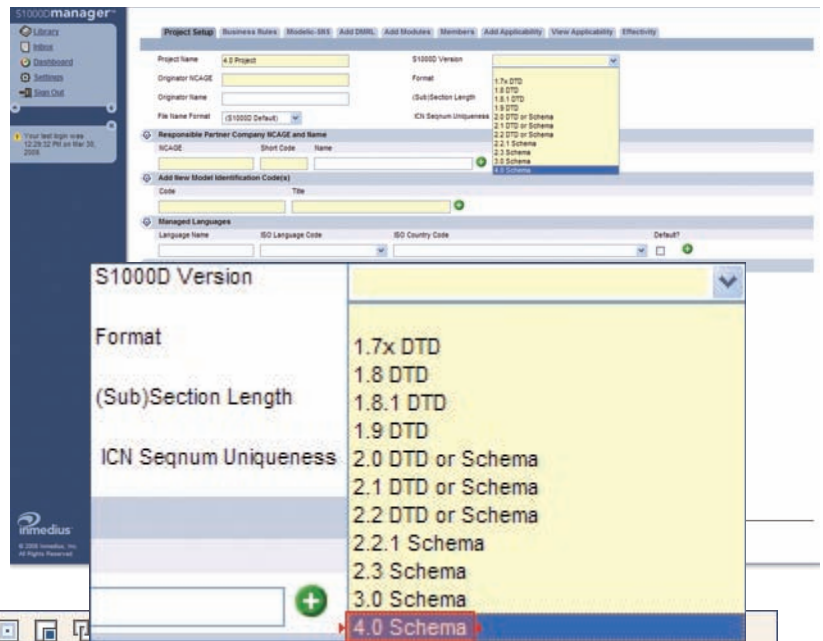

S1000D Issue 4.0 Schema Basic Support

The ability to manage and edit the new Issue 4.0 data structures is included in the v3.2 software releases. S1000Dmanager supports full status management of Issue 4.0 Data Modules. The current release of S1000DauthorPro includes initial support for the following Data Module types:

- Procedural
- Descriptive
- Illustrated Parts Data (IPD)
- Crew
- Fault

Other Enhancements

- Enhanced Support for Multimedia Element
- Automatic Detection of SGML, DTD Compilation
- AuthorPro Toolbar Option to Show/Hide ID Status
- Refdm Dialogue Enable for SGML Publication Modules in Arbortext® Editor™ 5.2
- New Batch ID Validation and Assignment in Cross Reference Dialogue
