

S1000D review™ v1.2 Feature Enhancements

Supports Linux, New Multi-User Comments

S1000Dreview is the Quality Assurance solution for S1000D® documents, streamlining the comment and approval process in a complete, closed-loop system. **Review** v1.2 is a maintenance release that has been updated to support Linux installations and for seamless integration with **S1000Dmanager™** v3.2. The June 2009 software update includes items and other enhancements requested by our valued clients. A key time-saving feature improving efficiency is the ability to view multi-user comments, which eliminates duplicating remarks and repetitive explanations. This document highlights, illustrates and briefly describes these features.

Ability to View Multi-User Comments Saves Time, Eliminates Duplication

With **Review** v1.2, users have the ability to view, but not edit another reviewer's comments. The administrator retains the option of restricting comments for a blind review, if desired. In a blind review, the software only displays comments made by the individual, commenting user. The system default, however, is to show and share multiple reviewers' comments.

A screenshot of a web application interface titled 'Add Manual'. It features several input fields and controls: a 'File' field with a 'Browse...' button; an 'Administrator' dropdown menu set to 'admin'; a section for 'Accepted Comments' with radio buttons for 'Post to S1000D Manager' (selected) and 'Email to' (with an empty text field); a 'Reviewers:' section with a list box containing 'admin', 'firstadmin', and 'simple', and a separate empty list box with '+' and 'x' icons; and a 'Blind Review' checkbox at the bottom left, which is circled in red. A red arrow points from this checkbox to a text box on the right.

Disabling Blind Review allows users to view each other's comments, so that time is not wasted adding duplicate remarks.

Added Support for Installations on Linux Based Browsers

Review is now supported on non-Windows client systems, allowing for the Internet browser, Mozilla FireFox®.
