

Expert CYPRES (1) Model (Figure 4 — Expert CYPRES (1) Control Unit and Processing Unit).

- 1.1d(1) The control unit button is red with no markings. If the vertical speed is faster than approximately 35 meters per second (78 miles per hour / 115 feet per second), the Expert CYPRES (1) model is set to activate at approximately 750 feet above the drop zone. The setting is graduated in feet, and the control unit display is graduated in 30-foot increments.
